

## **HOMEOWNER TIP**

### **Dishwasher Recall**

General Electric has issued a product recall for most of its dishwashers produced between September 1997 thru December 2001. The problem causes unexpected fires due to wiring being affected by the faulty rinse dispenser.

Since almost ALL homes in Hollands Crossing were built during this timeframe and equipped with General Electric appliances, it is recommended you contact General Electric for a free repair or replacement of your dishwasher. The contact info for the recall is:

- RECALL HOTLINE 1-877-607-6395
- or
- WEBSITE [www.geappliances.com/recall](http://www.geappliances.com/recall)  
This is the easiest method to determine if your dishwasher is on the recall list.

You will need your MODEL NUMBER and SERIAL NUMBER  
This can be found by opening the door and looking in the upper left corner of the inside of the dishwasher. The information is on a 1 inch X 2 inch metal tag.
